DETAILED OFFICE ACTION

Rejections Under 35 USC 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 4, 5, 7-9, 16-22, 24 and 26 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling for the claims as written.

Claim 1 does not require a solvent, but the specification (e.g., page 5, line 13) makes it clear that a solvent is critical or essential to the practice of the invention. Claim 24 does not require a base, but the specification also makes it clear that a base is to be used as condensing agent. Therefore, the disclosure does not enable these claims. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, 7-9 and 16-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites, "... at a temperature from 25°C to 90°C, in a condensation reaction in the presence of a base after completion of the condensation reaction, diluting the condensation reaction ..."

This is ambiguous. It is not possible to determine if the "after completion" refers to when

Art Unit: 1624

the base is added, or when the diluting is done. The way the comma is placed, it actually leans a little toward the former, though the latter is probably what is intended.

Allowed Claims

Claims 6, 10-15 and 27 are allowed. Following is an examiner's statement of reasons for allowance.

US Patent 4,804,663 describes the preparation of risperidone by the N-alkylation of 6-fluoro-3-(4-piperidinyl)-1,2-benzisoxazole with 3-(2-chloroethyl)-6,7,8,9-tetrahydro-2-methyl-4H-pyrido[1,2-a]pyrimidin-4-one hydrochloride in dimethylformamide solvent using sodium carbonate base and potassium iodide catalyst. However, that patent does not show or suggest that the hydrochloride salt of the benzisoxazole compound may be used in the reaction nor the solvents of the presently claimed process. In addition, claims 6, 10-15 and 27 are not anticipated or rendered obvious by any of the other art of record, whether taken individually or in any combination.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cecilia M. Jaisle, J. D. whose telephone number is 571-272-9931. The examiner can normally be reached on Monday through Friday; 8:30 am through 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. James O. Wilson can be reached on 571-272-0661. The fax phone
